

## ProSpool Bag Sealing Tape

We offer a wide range of Bag Sealing Tape, in many cases available ex-stock, ideal for use on modern bag sealing machinery. The principal benefit of using a spool wound tape is the long running time, with typically 40,000 – 50,000 bags sealed per spool. We work closely with the leading machine manufacturers, so please contact us if you would like to learn more about the cost benefits of using ProSpool Bag Sealing tape.

**Substrates:** As well as PVC-based tapes, we offer tapes using a PVC-free Bi-axially Oriented Polypropylene (BOPP) substrate. This is FDA approved for Food Contact use. The non-adhesive side of all our tapes is treated to ensure good ink adhesion when product information is printed onto it.

**Colours:** Whilst yellow has become our most popular colour, tapes can be supplied in almost any colour. Silver and gold are often requested to indicate a premium product. Please contact our Sales Team if you require a special colour, ideally providing a Pantone colour reference or physical sample. Due to the nature of our production processes, there is a minimum order quantity of 54 rolls for special colours.

**Adhesives:** The adhesive used is based on natural products and formulated to facilitate resealing of a bag closure.

**Features:** Many bag sealing processes insert a paper ‘liner’ during the sealing process to make the seal easy to open. As well as providing the paper tape, which can be printed to indicate the originating plant, we produce ‘**Easyseal**’ and ‘**Target**’ tapes that do not require a paper liner. These have an area marked on the tape where the adhesive is neutralised.

### Principal Lines:

The table below shows our most popular products. Please ask if the specification you require is not listed.

Feature	Colour	Tape Substrate	Width (mm)	Length (m)	Box Qty	Pallet Qty	ProSpool Stock Code
